About Me

I am an Information Technology professional with hands-on experience in web development and software engineering. I am dedicated, reliable, and communicative, with a strong ability to adapt in dynamic work environments. With a solid foundation in both frontend and backend development, I continue to sharpen my skills through real world projects and challenges. Passionate about learning and growing, I am committed to delivering effective solutions and contributing positively and striving to support team success through collaboration and effective solutions.

Education Level

UNIVERSITAS DARMA PERSADA (Jul 2020 – Aug 2024)

Bachelor of Information Technology Studies – GPA 3.36/4.00

Work Experiences

PT. Naturalva Herba Indonesia (Bekasi, Indonesia)

Full Time (January 2025 – Present)

- Currently contributing to the development of an HRIS system using React.js and Express.js, focusing on building dynamic UI components, data tables, and role-based access management to improve usability and performance, as well as supporting GA/Asset Management modules for tracking company assets and administrative needs.
- Contributed to LMS development using Laravel, Inertia.js, and React (TypeScript), focusing on course/enrollment workflows, assessments and feedback modules, role-based access control, and export-ready reporting to improve learning operations and user experience.
- Developed internal CRM web application features using CodeIgniter, with a focus on the shipment upload module for admin users, also worked on other corporate web systems using Laravel.
- Integrated third-party Rest API's to support logistics processes and ensure smooth data synchronization between platforms.
- Built a custom WhatsApp rotator system using WordPress to automate customer support message routing for admin CS team.
- Assisted with additional technical support tasks, including basic installation of network LAN cables and CCTV devices.

PT. Alprima Rayya Persada (Bekasi, Indonesia)

Part Time Flexible (Desember 2025 – Present)

- Developed a side project job portal platform called Karierku using Laravel, where I built and maintained the CMS (Content Management System)/backoffice system and public facing website, including job posting management, user authentication, and application workflows, additionally collaborated with the Department of Transportation (Dishub) to develop an E-Ticketing system for port operations, handling booking management, data processing, and system optimization end-to-end using Laravel.

PT. Bayan Resources (Jakarta, Indonesia)

Internship (September 2024 – December 2024)

- Assisted employees in the Import Procurement process by inputting Pemberitahuan Impor Barang (PIB), Surat Kuasa, Bill of Lading, Purchase Order, and Job Order.

Bank Indonesia (Jakarta, Indonesia)

Internship (July 2023 - August 2023)
